

INTERMEDIATE STATION #2: AIRWAY

TIME LIMIT: 15 MINUTES

START: _____

FINISH: _____

Candidate Name: _____ **#** _____ **Date:** _____

SKILL DESCRIPTION	YES	NO	COMMENTS
1. OXYGEN, BAG VALVE MASK			
A. Takes or verbalizes Body Substance Isolation (BSI) precautions			
B. Attaches oxygen tubing (Regulator to Reservoir)			
C. Inserts Oral Airway			
D. Uses 10 - 15 Liters Per Minute (LPM) Oxygen			
E. Ventilates manikin every 5 – 6 seconds with chest rise		Critical Skill	
2. OXYGEN – SUPPLEMENTAL			
A. Applies Non Rebreather Mask with Reservoir inflated			
3. ENDOTRACHEAL INTUBATION Patient is being ventilated and is in correct anatomical position			
A. Directs ventilation of patient			
B. Assembles Equipment			
C. Checks cuff for leaks			
D. Lubricates cuff			
Basic care is stopped			
E. Uses left hand to advance laryngoscope into the oropharynx until vocal cords are visualized (NOTE: Candidates may use right hand if they bring appropriate blades.)		Critical Skill	
F. Teeth NOT used as fulcrum		Critical Skill	
G. Inserts ET and removes laryngoscope		Critical Skill	
H. Inflates distal cuff until resistance is met		Critical Skill	
I. Ventilates, and auscultates both lungs and epigastrium		Critical Skill	
J. Attaches and verifies tube placement by ETCO ₂ Detector or E.D.D.		Critical Skill	
K. Secures tube in place		Critical Skill	
L. Patient NOT WITHOUT ventilations for more than 30 seconds		Critical Skill	

Passing Criteria: All Critical Skills “Yes” and no more than 2 other “No’s”

Total “No’s” other than “Critical Skill: _____ **Pass:** _____ **Fail:** _____

Examiner: _____
